PROFILE

Senior Frontend Engineer, with 6+ years of experience building scalable, accessible, and performant applications using React and TypeScript. Proven track record leading frontend initiatives, improving developer experience, and delivering mission-critical features in fast-paced Agile environments. Passionate about component-driven design, UI performance, and team mentorship.

Languages: TypeScript, JavaScript, HTML, CSS, SQL

Frontend: Next.js, React, Redux, Context API, SCSS Modules, Ant Design, MUI

Backend: Node.js, NestJS, .NET Core

Testing: Jest, React Testing Library, Playwright

DevOps/Cloud: Git, Docker, Kubernetes, AWS, Azure, GitLab, CI/CD

Tools: Postman, Figma, Jira, Confluence, BitBucket

EXPERIENCE

Frontend Engineer, Crisis24

Jul 2022 — Present

- Led frontend development for Crisis24's mass notification and risk intelligence platforms using React + TypeScript.
- Designed message templates, multi-channel workflows, and itinerary tooling adopted by Fortune 500 clients.
- Migrated Redux to React Context and introduced SCSS Modules with BEM, reducing boilerplate by ~40% and improving code clarity across teams.
- Created structured frontend documentation using README files and C4 diagrams to clarify architecture and accelerate onboarding.
- Boosted developer productivity with alias pathing, shared UI libraries, and Prettier configs enforced via Husky pre-commits.
- Built reusable API proxies for internal services, cutting frontend logic by ~30% and promoting a DRY architecture across UIs.
- Championed testing with Jest and RTL, increasing coverage by 30%+ and reducing post-release bugs.
- Mentored 3+ junior devs and contributed to scalable frontend architecture adopted across teams.

Prior Experience

Frontend Engineer - Lexis Nexis (2021-2022)

.NET Engineer - Southern Company (2021)

Frontend Engineer - Intercontinental Exchange (2019-2020)

Full Stack Engineer - Teradata (2016-2019)

Junior Frontend Engineer - ETV Software (2015-2016)
